👤 PROFILE

Dynamic Software Developer with 7 years of experience in mobile application development and a robust background in web and back-end systems. Proven ability to lead cross-functional teams, optimize agile processes, and drive technical architecture decisions to enhance application performance and user experience. Throughout my career, I've refined my organizational skills and adapted to diverse challenges, shaping me into a versatile and resourceful professional.

🎓 EDUCATION

Master in Blockchain and Cryptoassets, IEBS Biztech School

2024 — 2025

Computer engineering Degree, Universitat de Barcelona

2015 — 2021

📁 EMPLOYMENT HISTORY

Mobile Developer at CaixaBank Tech, Barcelona

Jun 2022 — Present

- Lead the development and maintenance of Android and iOS mobile applications, ensuring optimal performance and user satisfaction.
- Collaborate closely with cross-functional teams to efficiently implement new features and resolve technical issues throughout the development lifecycle.
- Mentor and guide technical teams, promoting best development practices, coding standards, and scalable architectures to ensure highquality software.
- Drive technical architecture decisions, integrating new technologies to enhance scalability, security, and user experience of applications.
- Optimize agile development processes, reducing delivery times and improving collaboration across project stakeholders.

Mobile Developer at Leadtech Group, Barcelona

Apr 2021 — Jun 2022

- Designed and architected scalable mobile solutions, contributing to the implementation of new features and improving user experience.
- Developed internal tools and automation processes that increased team efficiency, significantly reducing time-to-market for new releases.
- Diagnosed and fixed issues in live production environments, ensuring stability and improving app reliability.
- Coordinated and led code review sessions, promoting the adoption of best

practices and development standards across the team.

- Implemented unit and integration tests, ensuring high coverage and minimizing risk of failures in production.

Android Developer at Ludium Lab

Feb 2020 — Apr 2021

- Led the end-to-end development of Android applications, ensuring proper implementation of new features and alignment with stakeholder requirements.
- Collaborated closely with UX/UI teams to ensure intuitive and seamless user experiences, optimizing app performance across a wide range of devices.
- Developed and implemented robust and scalable architectures, enabling efficient integration of new technologies and expanding app functionality.
- Optimized app performance, reducing load times and improving overall efficiency, resulting in a significant increase in user retention.
- Acted as a go-to resource for resolving complex technical issues, helping team members overcome obstacles and achieve project goals.

Android Developer at Rakuten TV, Barcelona

Aug 2019 — Feb 2020

- Collaborated on designing, developing, and implementing new features in the Android app for Rakuten TV, enhancing user experience and platform interaction.
- Diagnosed and resolved critical issues in the app, improving stability, load speed, and reliability across various devices.
- Implemented comprehensive unit tests to ensure code robustness, addressing edge cases and enhancing overall app reliability.
- Worked closely with QA teams to ensure continuous validation of features and functionality through

Technical Assistant at Universitat de Barcelona, Barcelona

Jun 2017 — Jul 2019

- Provided maintenance and installation of technical devices, ensuring smooth operations and system performance.
- Supported technical teams with troubleshooting, repairs, and preventive maintenance of devices.
